

Online Resource Request Form SpringerOpen Institutional Membership

Recipient's Name: _____

Recipient's Job Title: _____

Recipient's Department: _____

I recommend that our institution considers joining SpringerOpen's institutional membership program. SpringerOpen's membership program allows institutions to actively support open access in scholarly publishing. If we were to join SpringerOpen, all researchers at our institution could publish their papers entirely for free, and make them available to the entire scientific community free of charge. We would have a customized web page created for us on

SpringerOpen where our research could be listed and linked to the full text on our own server. For more information, see

<http://www.springeropen.com/libraries/membership>.

Please contact **institutions@springeropen.com** to find out more about this program and membership fees.

Please contact me if you have any questions.
