

# Publish Open Access with Springer

Make your research freely available online, while retaining the copyright, complying with open access mandates and benefiting from high-quality peer-review and editorial processes.

Interested? Springer offers you a variety of open access options.

Open  
Access

## Open Choice

**Your Research. Your Choice.**

Publish your article open access in one of our over 1,500 subscription-based journals with the Open Choice option.

## SpringerOpen

**Our Portfolio of Open Access Journals and Books across all Disciplines**

Choose from over 190 open access journals across all areas of science, technology, medicine, the humanities and social sciences, including our interdisciplinary journal SpringerPlus, or publish your next book open access.

## BioMed Central

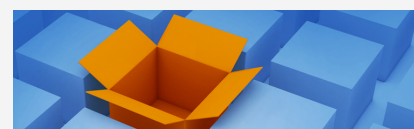

**The Pioneer in Open Access Publishing**

BioMed Central offers you an established portfolio of over 260 open access journals in the fields of biology, biomedicine and medicine.

## Chemistry Central

**Our Open Access Chemistry Portal**

Make your research freely available in one of our eight peer-reviewed, open access journals covering all areas of chemistry.

 **BioMed Central**  
The Open Access Publisher

 **Chemistry Central**

## Learn about your various funding options!

### **Journal Sponsorships**

Over 90 of our [SpringerOpen](#) and [BioMed Central](#) journals are fully sponsored by a society or institution, which means you can publish in them free of charge.

### **Open Access Membership Program**

All SpringerOpen, BioMed Central and Chemistry Central journals are covered by our membership program, which allows institutions to actively support open access by covering some or all of the publication fees for their affiliated researchers. There are currently over 480 members worldwide.

### **Open Access Waiver Fund**

We provide automatic waivers to researchers based in low-income countries and evaluate individual waiver requests on a case-by-case basis.

### **Institutional Open Access Funds and General Funding**

Institutions, universities and funders worldwide have created funds dedicated to covering open access publishing costs or have made open access fees part of their general funding.
