Access

Welcome to SpringerOpen

Your home for open access publishing

SpringerOpen is Springer's portfolio of over 190 peer-reviewed, fully open access [journals](#) and [books](#) across all areas of science, technology, medicine, the humanities and social sciences. SpringerOpen enables you to broaden your readership and increase the visibility of your work, while retaining copyright and complying with open access mandates.

Why should you publish with SpringerOpen?

High visibility thanks to unrestricted online access

SpringerOpen publications are [freely available online](#) to anyone, expanding distribution, raising your profile and increasing visibility, discoverability and citations for your work.

Rigorous peer and editorial review

SpringerOpen journals and books are subject to the same [high-quality peer review](#), production and publishing standards that you and your readers have come to expect from Springer.

Publish your work quickly

A streamlined and easy to use [online submission](#) and production process enables your work to be quickly reviewed, approved and published.

Unlimited space for supplementary material

There are no space constraints or color figure charges. Publishing online means unlimited space for figures, extensive data and video footage.

Free re-use and distribution of your work

The use of a [Creative Commons license](#) allows for re-use and distribution of your publication, as long as you, the original author, are correctly attributed. You retain copyright.

Comply with open access mandates

All SpringerOpen journals are published under the liberal [Creative Commons Attribution \(CC BY\)](#) license so you can easily comply with the open access mandates of your institution or funding body.

Citation tracking and inclusion in bibliographic databases

SpringerOpen journals are tracked for [impact factors](#) just as subscription-based journals and are deposited into bibliographic databases and institutional repositories without any embargo period.

Broaden your audience through different platforms

All SpringerOpen publications are freely available online at [SpringerLink](#), the world's most complete online collection of STM content. In addition, all articles are freely accessible via the journals' dedicated websites at [springeropen.com](#).

"The Helmholtz Association was very pleased to see Springer move towards open access publishing. Open access facilitates working in digital research environments and improves the public perception of research results. We are pleased that Helmholtz scientists increasingly decide to publish their results in open access journals."

Heinz Pampel, Coordinator of the OA Project at Helmholtz Association, Germany

"... scholars write journal articles for impact, not for money. In the age of print, they had no choice but to publish their articles in journals of limited circulation. That's no longer the case."

Peter Suber, Director of the Harvard OA Project and leading OA advocate

We have you covered

From astronomy to zoology, SpringerOpen covers all disciplines, so your work can find a home no matter what your field of research.

SpringerOpen offers you...

... a portfolio of over 190 fully open access journals

springeropen.com/journals

... very specialized titles as well as SpringerPlus, an interdisciplinary journal

springerplus.com

... an open access option for all types of books

springeropen.com/books

Benefit from our Open Access Membership Program and other funding options

Together with [BioMed Central](#), we run an [Open Access Membership Program](#) which enables institutions to cover some or all of the publication cost for their researchers. Authors at member institutions can publish in any SpringerOpen and BioMed Central journal at a reduced rate or even no cost at all, and they receive a 15% loyalty discount on the publication fee when they publish a SpringerOpen book. To find out if your institution is a member, please visit springeropen.com/inst.

In addition, over 80 SpringerOpen journals are fully sponsored by a society or institution so you can publish in them without any costs. Visit springeropen.com/journals for a list of all sponsored journals.

To learn about other funding options, including our waiver fund and open access funds from institutions and organizations around the world, please visit springer.com/oafunding.

About Springer

Springer is a leading global scientific publisher of books and journals, delivering quality content through innovative information products and services. Springer is part of the publishing group Springer Science+Business Media. In the science, technology and medicine (STM) sector, the group publishes around 2,000 English-language journals and more than 8,000 new books a year, and the group is home to the world's largest STM eBook collection, as well as the most comprehensive portfolio of open access journals. The group employs more than 7,000 individuals across the globe.

About BioMed Central

BioMed Central, acquired by Springer in 2008, is an STM publisher, which has pioneered the open access publishing model. BioMed Central's portfolio encompasses over 260 open access journals in all areas of biology, biomedicine and medicine, and various other products and services such as Open Repository, a hosted digital repository solution for institutions. BioMed Central's journals complement the SpringerOpen portfolio and our combined expertise supports open access journals in every aspect.

Article-level metrics are provided on each article page, including citations, accesses and social media mentions.

The screenshot shows the article page for "Risk reduction through community-based monitoring: the vigías of Tungurahua, Ecuador" in the Journal of Applied Volcanology. The page includes a search bar, navigation tabs (Home, Articles, Authors, Reviewers, About this journal, My Journal of Applied Volcanology), and a sidebar with viewing options and associated material. The main content area displays the article title, authors (Jonathan Stone, Jenni Barclay, Peter Simmons, Paul D Cole, Susan C Loughlin, Patricio Ramon and Patricia Mothes), and the corresponding author's email (jon.stone10@gmail.com). The article is marked as "Highly accessed" and "Open Access".
